FCC ID: TXTPTM10

RF Exposure report

The Equipment Under Test (EUT) is a TXTPTM10 with Bluetooth 4.0 BLE operating at 2402-2480MHz, 40 channels with 2MHz channel spacing, for more detailed features description, please refer to the user manual.

Bluetooth 4.0 BLE

Modulation Type: GFSK.
Antenna Type: PCB antenna

Antenna Gain: 5.0dBi

The nominal conducted output power specified: 5dBm (Tolerance: +/-1dB)

The maximum conducted output power for the Bluetooth is 4.99dBm in the frequency 2.402Hz which is within the production variation.

The minimum conducted output power for the Bluetooth is 4.73dBm in the frequency 2.480Hz which is within the production variation.

According to FCC Part 2.1091, this unlicensed transmitting devices is categorically excluded from routine environmental evaluation for RF exposure prior to equipment authorization or use, According to the KDB 447498 and OET 65, the simple calculation as below:

For Maximum Permissible Exposure (MPE) evaluation of the product, the maximum power density at 20 cm from this transmitter shall be less than the General Population / Uncontrolled MPE limit in FCC Part 1.1310.

The maximum E.I.R.P= 5+1+5=11dBm=12.59mW

The source-based time averaged maximum radiated power = 12.59 x Duty Cycle = 8.434mW

From above data, the exposed power density at a distance (R) of 20cm from the center of radiation of the antenna can be calculated according to OET Bulletin 65 as follow:

- $= 8.434 / 4\pi R^{2}$
- = 0.0017mW/cm^2

The MPE limit is 1.0 mWcm⁻² for general population and uncontrolled exposure in the Bluetooth 4.0 BLE frequency range according to FCC Part 1.1310. As the measured power density at 20cm from the transmitter is lower than the MPE limit, the compliance to the MPE limit can be

FCC ID: TXTPTM10

ensured by indicating the minimum 20cm separation between the transmitter's radiating structure and body of the user or nearby persons.

Transmitter Duty Cycle Calculation

The EUT transmit continuously during the test, the duty cycle is 66.99%.

The following RF exposure statement or similar sentence is proposed to be included in the user manual:

"FCC RF Radiation Exposure Statement Caution: This Transmitter must be installed to provide a separation distance of at least 20 cm from all persons."
